

CrossTec  
**SchoolVue®**  
Classroom Management Software

CrossTec SchoolVue® classroom management software gives instructors control of classroom technology at all times. Instructors can monitor and manage every student's computer activity from a single PC. Then they can view exactly what every student is working on, keep students' attention, and increase student time on-task. The capability to instruct, monitor and interact with students is enhanced in one software solution that is extremely easy to use.

CrossTec SchoolVue delivers solutions to real problems.

- Classroom management software has been proven to improve learning by giving students more time on lessons, and results in more effective and efficient use of teaching time.
- Gives students easy to use tools they need to better exploit the available technology infrastructure.
- Delivers instant, on demand technical support to the teacher when needed, where needed.
- Eliminates inappropriate technology use.

It is a necessary tool to manage classroom assets, people and behavior.

### Benefits

- **Monitor Students' Activity and Comprehension Level** – a teacher can supervise the entire class, and quickly and easily gain real-time insight into student activity and topic understanding.
- Supervise students when they are on-line in forums or search forms.
- Provides feedback to the student on current lessons. Improves on classroom synergy.

**Save Time** - Easy to install, easy to learn, easy to use.

- Be confident that your students aren't wasting class time on games, e-mail or the Internet.
- Poll the class and show instant results.
- Design tests and quizzes quickly and with ease.

**Save Money** - CrossTec SchoolVue is an all-in-one solution.

- No add-ons or plug-ins are required to fully use and value SchoolVue.
- The print management feature saves money on paper and toner costs.

### System Requirements & Pre-requisites:

Win2000, 2003, 2008, XP and Vista  
35 Mbytes free disk space (90Mbytes Full Install)  
IPX/SPX, NetBEUI, TCP/IP

### Features

- **Powerful Classroom Management** – Power on/off all computers, remotely log on/off all computers in a single action, create custom classroom layouts.
- **Student Instruction** – Show the teacher's screen to all members of the class, a selected desktop, or show a selected application. Show a recording of a previous remote control session to the class or broadcast a multimedia file. Leave a full recording of the presentation on each student desktop for later review.
- **View Student Screens** – Monitor the entire class or selected students. View using scalable thumbnails of each PC, mouse over for larger zoom view or click for full 1:1 remote control.
- **Printer Management** – Control classroom printer usage or individual printer usage.
- **Tech Console** – All computers in the school can be managed and maintained centrally.
- **Student Journaling** - Provide a complete record of a lesson. Journaling includes a full record of lesson details and objectives, teacher and the student's own notes, screenshots, survey results, URLs used, and individual quiz results.
- **Student Register** – Generate and store student attendance records and information.
- **Metering and Control** – Applications and Internet usage can be controlled by a teacher by using approved and restricted lists to control availability.
- **Device Control** – Completely block or limit use of USB thumb drives, iPods, DVD and CD ROM drives. Disable speakers.
- **Get Support** – A single click of the toolbar button on the Tutor console will connect the teacher to an available technician.
