Classroom Management Made Easy

CrossTec Corporation presents SchoolVue Version 11, the most modern, feature-rich version of our award winning classroom management software. SchoolVue provides teachers with the ability to instruct, monitor, and interact with their students, one-on-one, as a group, or as an entire class.

SchoolVue meets the demand of the 21st Century Classroom by its proven ability to enhance learning and streamline classroom technology. SchoolVue covers all aspects of modern instruction by providing the ability to deliver digital lesson content, simultaneously monitoring all student PCs, increasing collaboration through classroom technology, as well as the ability to capture and retain student attention and focus at all times. SchoolVue is an all-inclusive suite which includes the ability to design and administer customized tests, a dedicated technician console for IT staff, digital student revision aids, lesson planning tools, and the option for teachers to positively reinforce students for exceptional performance and effort.

SchoolVue is designed to be used on any Windows computer and offers enhanced performance for both wired and wireless classrooms, with one-to-one programs in mind. SchoolVue also thrives in a virtual desktop, terminal server, or thin/zero client environment.

Features

Powerful Classroom Management

Power on/off or log on/off all computers in a single action. Create custom classroom layouts, lock or blank student screens, lock student keyboards and mice, and offer positive reinforcement for students.

Student Instruction

Show the teacher's screen to one student or all members of the class. Record or show student remote control sessions to the class or broadcast a multimedia file. Leave a full recording of the presentation on each desktop for later review. Interact with a student audibly while demonstrating a topic.

View Student Screens

Monitor the entire class or selected students. View using scalable thumbnails of each PC, mouse over for a larger zoom view, or click for full 1:1 remote control.

Printer Management

Control Classroom printer usage or individual printer usage.

Tech Console

Technicians can get a snapshot of all hardware and software information, monitor, manage and maintain all PCs, and quickly transfer files, folders, and updates with the Tech Console.

Student Journal

Provide a complete record of a lesson. Journaling includes a full record of lesson and objectives, teacher and student notes, screen shots, survey results, URL/browsing history, and individual quiz results.

Student Register

Generate and store student attendance records and information.

Metering and Control

Applications and internet usage can be controlled by using approved and restricted lists to control availability.

Device Control

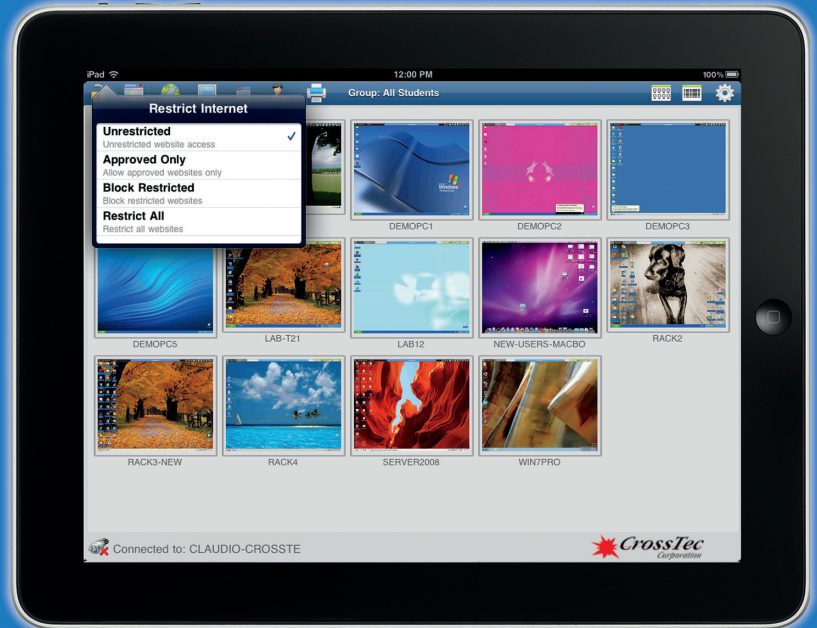

Completely block or limit use of USB thumb drives, iPods, DVD, and CD drives. Disable speakers.

Get Support

A single click of the toolbar button on the Tutor console will connect the teacher to an available technician.
